

BLEND PARALIN

Campina offers a wide range of Anhydrous Milk fat compositions, blended with vegetable oil and/or supplements. Each of these paralin blends are designed as a top-quality ingredient for bakery, chocolate (fillings), spreads, cooking and frying oils. The high quality of our blends starts with the use of Original AMF traceable to our own member farmers.

Our paralins can be completely customized into your needs. Original AMF of Performance AMF can be blended in different ratios with almost each type of vegetable oil and/or additional flavors and fragrances can be added. This makes our paralins unique in its kind. We also offer you a wide variety in packaging options including boxes (25kg), drums (225kg) and bulk (20T).
